DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 31 March 2009 has been entered.

Response to Amendment

2. Applicant's amendment filed 31 March 2009 amends claims 1, 17, 23, and 26. Claims 21, 22, 27, and 28 have been cancelled. Applicant's amendment has been fully considered and entered.

Response to Arguments

3. Applicant's arguments with respect to Baugher have been fully considered and are persuasive. The previous claims rejections have been withdrawn.

Allowable Subject Matter

4. Claims 1-4, 17-20, 23-26 are allowed.

The following is an examiner's statement of reasons for allowance: The claims are drawn towards receiving media packets across a firewall to a single destination address and a single destination port of a firewall wherein a plurality of security associations, which include source information of a sending client and an indication of a receiving client, are established for dialogs between sending clients and receiving clients. Encrypted media packets are received at the destination address and port in Real-time transport protocol message format at a media-relay

server. A determination is made as to whether or not a security association exists using the sender's source information received with the media packet wherein the sender's source information is unencrypted and includes a source address. If no security association exists, the packet is dropped. However, if a security association exists, the packet is decrypted. The synchronization source identifier retrieved from the decrypted packet is compared against the synchronization source identifier in the security association. If the identifiers do not match, the packet is dropped. However, if the identifiers match, the packet is forwarded to a receiving client indicated in the security association based on the sender's source information.

The prior art does not disclose or make obvious the claimed features described above, wherein the composite recitation incorporated into independent claims 1, 17, and 23, renders these claims, and their dependants, allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
